

21) Next Steps & Certificate Request Lesson

Congratulations!

3 min to complete · By Brandon Gigous

Well... Here you are. You did it! :D A bouquet of flowers and lots of congratulations to you for making it all the way through this Flask Web Development course.

You've gone over a lot and you've learned a ton, all the way from building your first Flask app through working with APIs, server deployments, and whatever special sauce you added to your final capstone project.

You've truly learned a lot and with the knowledge and practice you have achieved by diligently working through this course, you are ready to apply for a Junior Flask Back-End

Developer position. There's always more to learn, and more to train, so keep up the work, expand your portfolio, and stay in touch with our community.

Hungry for some more tutorials to keep up your Flask training routine? Head over to the next page where you'll see a collection of additional tutorials you can follow to keep your skills fresh and edge them deeper into your memory lanes.
